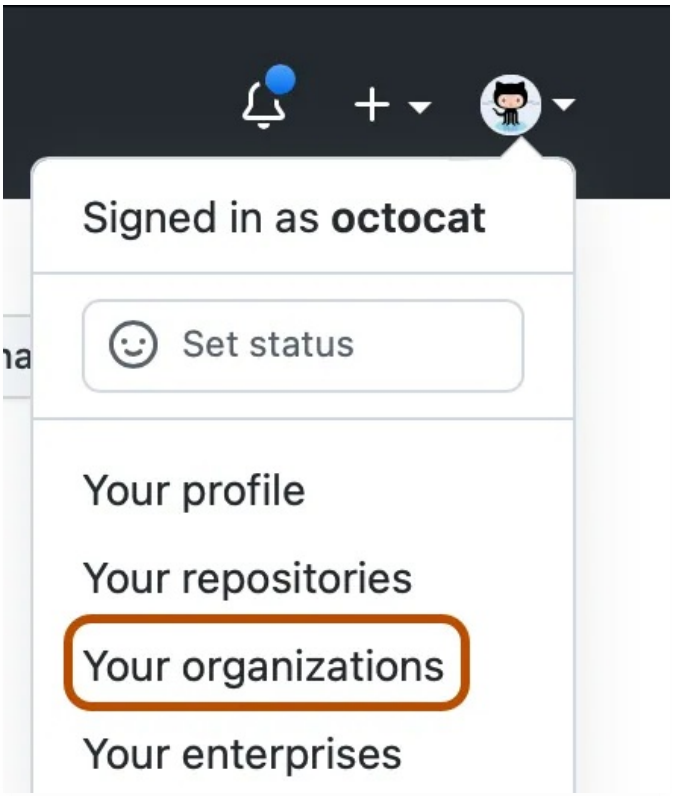
Setting team creation permissions in your organization

You can allow all organization members to create teams or limit team creation to organization owners.

Organization owners can set team creation permissions.

If you do not set team creation permissions, all organization members will be able to create teams by default.

1. In the top right corner of GitHub.com, click your profile photo, then click **Your organizations**.



2. Next to the organization, click **Settings**.
3. In the "Access" section of the sidebar, click **Member privileges**.
4. Under "Team creation rules", select or deselect **Allow members to create teams**.
5. Click **Save**.
