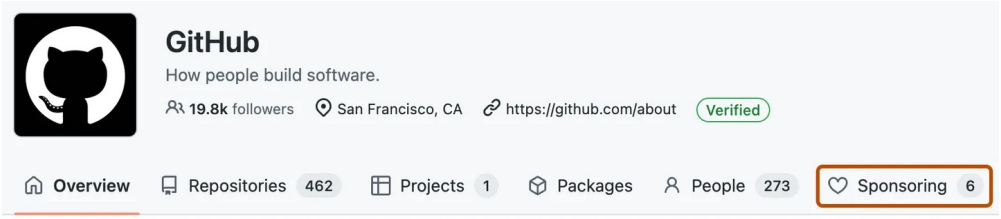
# Setting an end date to a sponsorship

You can set an end date to an existing or new sponsorship.

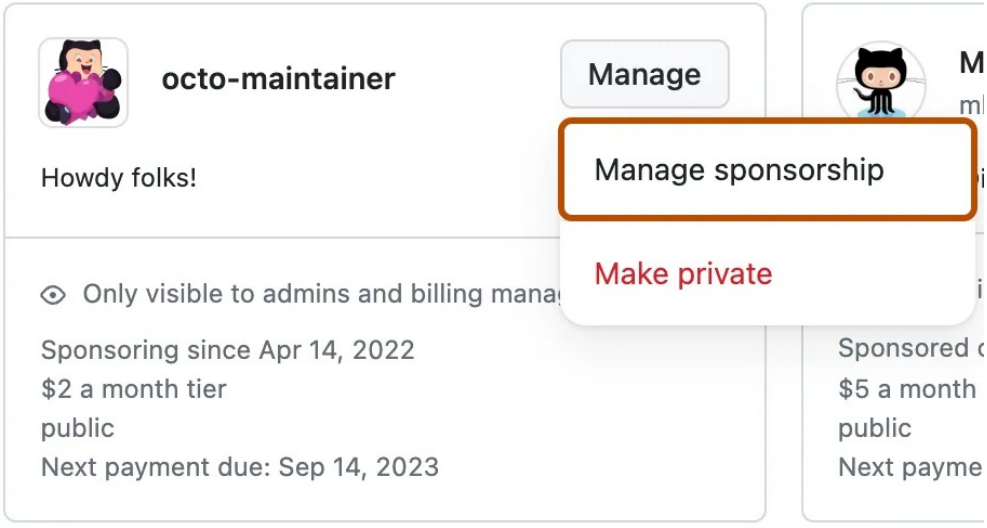
You can set an end date to your sponsorship. The end date assigned will be the last date for which you will be charged for that sponsorship, but the sponsorship will show active for another month. For example, if October 2023 is set as the end date, the last sponsorship will be charged in October 2023, but the sponsorship will be shown as active until November 2023. For more information about setting an end date to a new sponsorship, see "Sponsoring an open source contributor through GitHub."

## Setting an end date for an existing sponsorship

1. On GitHub.com, navigate to the main page of the organization.
2. Under your organization name, click ♡ **Sponsoring**.



3. Next to the sponsorship you want to set an end date for, click **Manage**, and then **Manage sponsorship**.



4. To set an end date for the sponsorship, select **Set a sponsorship end date** and choose a month and year.
5. Click **Update sponsorship**.
