

The REST API is now versioned. For more information, see "[About API versioning](#)."

Actions

Use the REST API to interact with GitHub Actions for an organization or repository.

[GitHub Actions Artifacts](#)

[List artifacts for a repository](#)

[Get an artifact](#)

[Delete an artifact](#)

[Download an artifact](#)

[List workflow run artifacts](#)

[GitHub Actions Cache](#)

[Get GitHub Actions cache usage for an enterprise](#)

[Get GitHub Actions cache usage for an organization](#)

[List repositories with GitHub Actions cache usage for an organization](#)

[Get GitHub Actions cache usage for a repository](#)

[List GitHub Actions caches for a repository](#)

[Delete GitHub Actions caches for a repository \(using a cache key\)](#)

[Delete a GitHub Actions cache for a repository \(using a cache ID\)](#)

[GitHub Actions OIDC](#)

[Set the GitHub Actions OIDC custom issuer policy for an enterprise](#)

[Get the customization template for an OIDC subject claim for an organization](#)

[Set the customization template for an OIDC subject claim for an organization](#)

[Get the customization template for an OIDC subject claim for a repository](#)

[Set the customization template for an OIDC subject claim for a repository](#)

[GitHub Actions Permissions](#)

[Get GitHub Actions permissions for an enterprise](#)

[Set GitHub Actions permissions for an enterprise](#)

[List selected organizations enabled for GitHub Actions in an enterprise](#)

[Set selected organizations enabled for GitHub Actions in an enterprise](#)

[Enable a selected organization for GitHub Actions in an enterprise](#)

[Disable a selected organization for GitHub Actions in an enterprise](#)

[Get allowed actions and reusable workflows for an enterprise](#)

[Set allowed actions and reusable workflows for an enterprise](#)

[Get default workflow permissions for an enterprise](#)

[Set default workflow permissions for an enterprise](#)

[Get default workflow permissions for an enterprise](#)

[Get GitHub Actions permissions for an organization](#)

[Set GitHub Actions permissions for an organization](#)

[List selected repositories enabled for GitHub Actions in an organization](#)

[Set selected repositories enabled for GitHub Actions in an organization](#)

[Enable a selected repository for GitHub Actions in an organization](#)

[Disable a selected repository for GitHub Actions in an organization](#)

[Get allowed actions and reusable workflows for an organization](#)

[Set allowed actions for an organization](#)

[Get default workflow permissions for an organization](#)

[Set default workflow permissions for an organization](#)

[Get GitHub Actions permissions for a repository](#)

[Set GitHub Actions permissions for a repository](#)

[Get the level of access for workflows outside of the repository](#)

[Set the level of access for workflows outside of the repository](#)

[Get allowed actions and reusable workflows for a repository](#)

[Set allowed actions for a repository](#)

[Get default workflow permissions for a repository](#)

[Set default workflow permissions for a repository](#)

[GitHub Actions Secrets](#)

[List organization secrets](#)

[Get an organization public key](#)

[Get an organization secret](#)

[Create or update an organization secret](#)

[Delete an organization secret](#)

[List selected repositories for an organization secret](#)

[Set selected repositories for an organization secret](#)

[Add selected repository to an organization secret](#)

[Remove selected repository from an organization secret](#)

[List repository organization secrets](#)

[List repository secrets](#)

[Get a repository public key](#)

[Get a repository secret](#)

[Create or update a repository secret](#)

[Delete a repository secret](#)

[List environment secrets](#)

[Get an environment public key](#)

[Get an environment secret](#)

[Create or update an environment secret](#)

[Delete an environment secret](#)

[Self-hosted runner groups](#)

[List self-hosted runner groups for an enterprise](#)

[Create a self-hosted runner group for an enterprise](#)

[Get a self-hosted runner group for an enterprise](#)

[Update a self-hosted runner group for an enterprise](#)
[Delete a self-hosted runner group from an enterprise](#)
[List organization access to a self-hosted runner group in an enterprise](#)
[Set organization access for a self-hosted runner group in an enterprise](#)
[Add organization access to a self-hosted runner group in an enterprise](#)
[Remove organization access to a self-hosted runner group in an enterprise](#)
[List self-hosted runners in a group for an enterprise](#)
[Set self-hosted runners in a group for an enterprise](#)
[Add a self-hosted runner to a group for an enterprise](#)
[Remove a self-hosted runner from a group for an enterprise](#)
[List self-hosted runner groups for an organization](#)
[Create a self-hosted runner group for an organization](#)
[Get a self-hosted runner group for an organization](#)
[Update a self-hosted runner group for an organization](#)
[Delete a self-hosted runner group from an organization](#)
[List repository access to a self-hosted runner group in an organization](#)
[Set repository access for a self-hosted runner group in an organization](#)
[Add repository access to a self-hosted runner group in an organization](#)
[Remove repository access to a self-hosted runner group in an organization](#)
[List self-hosted runners in a group for an organization](#)
[Set self-hosted runners in a group for an organization](#)
[Add a self-hosted runner to a group for an organization](#)
[Remove a self-hosted runner from a group for an organization](#)

[Self-hosted runners](#)

[List self-hosted runners for an enterprise](#)
[List runner applications for an enterprise](#)
[Create configuration for a just-in-time runner for an Enterprise](#)
[Create a registration token for an enterprise](#)
[Create a remove token for an enterprise](#)
[Get a self-hosted runner for an enterprise](#)
[Delete a self-hosted runner from an enterprise](#)
[List labels for a self-hosted runner for an enterprise](#)
[Add custom labels to a self-hosted runner for an enterprise](#)
[Set custom labels for a self-hosted runner for an enterprise](#)
[Remove all custom labels from a self-hosted runner for an enterprise](#)
[Remove a custom label from a self-hosted runner for an enterprise](#)
[List self-hosted runners for an organization](#)
[List runner applications for an organization](#)
[Create configuration for a just-in-time runner for an organization](#)
[Create a registration token for an organization](#)
[Create a remove token for an organization](#)
[Get a self-hosted runner for an organization](#)
[Delete a self-hosted runner from an organization](#)
[List labels for a self-hosted runner for an organization](#)

[Add custom labels to a self-hosted runner for an organization](#)
[Set custom labels for a self-hosted runner for an organization](#)
[Remove all custom labels from a self-hosted runner for an organization](#)
[Remove a custom label from a self-hosted runner for an organization](#)
[List self-hosted runners for a repository](#)
[List runner applications for a repository](#)
[Create configuration for a just-in-time runner for a repository](#)
[Create a registration token for a repository](#)
[Create a remove token for a repository](#)
[Get a self-hosted runner for a repository](#)
[Delete a self-hosted runner from a repository](#)
[List labels for a self-hosted runner for a repository](#)
[Add custom labels to a self-hosted runner for a repository](#)
[Set custom labels for a self-hosted runner for a repository](#)
[Remove all custom labels from a self-hosted runner for a repository](#)
[Remove a custom label from a self-hosted runner for a repository](#)

[GitHub Actions Variables](#)

[List organization variables](#)
[Create an organization variable](#)
[Get an organization variable](#)
[Update an organization variable](#)
[Delete an organization variable](#)
[List selected repositories for an organization variable](#)
[Set selected repositories for an organization variable](#)
[Add selected repository to an organization variable](#)
[Remove selected repository from an organization variable](#)
[List repository organization variables](#)
[List repository variables](#)
[Create a repository variable](#)
[Get a repository variable](#)
[Update a repository variable](#)
[Delete a repository variable](#)
[List environment variables](#)
[Create an environment variable](#)
[Get an environment variable](#)
[Update an environment variable](#)
[Delete an environment variable](#)

[Workflow jobs](#)

[Get a job for a workflow run](#)
[Download job logs for a workflow run](#)
[List jobs for a workflow run attempt](#)
[List jobs for a workflow run](#)

[Workflow runs](#)

[Re-run a job from a workflow run](#)

[List workflow runs for a repository](#)

[Get a workflow run](#)

[Delete a workflow run](#)

[Get the review history for a workflow run](#)

[Approve a workflow run for a fork pull request](#)

[Get a workflow run attempt](#)

[Download workflow run attempt logs](#)

[Cancel a workflow run](#)

[Review custom deployment protection rules for a workflow run](#)

[Force cancel a workflow run](#)

[Download workflow run logs](#)

[Delete workflow run logs](#)

[Get pending deployments for a workflow run](#)

[Review pending deployments for a workflow run](#)

[Re-run a workflow](#)

[Re-run failed jobs from a workflow run](#)

[Get workflow run usage](#)

[List workflow runs for a workflow](#)

[Workflows](#)

[List repository workflows](#)

[Get a workflow](#)

[Disable a workflow](#)

[Create a workflow dispatch event](#)

[Enable a workflow](#)

[Get workflow usage](#)
