

Disabling issues

You may wish to turn issues off for your repository if you do not accept contributions or bug reports.

- 1 On GitHub.com, navigate to the main page of the repository.
- 2 Under your repository name, click  **Settings**. If you cannot see the "Settings" tab, select the ... dropdown menu, then click **Settings**.

- 3 Under "Features," deselect **Issues**.

If you decide to enable issues again in the future, any issues that were previously added will be available.

Please contact us through the [GitHub Support portal](#) if you want to turn off issues because of abuse from strangers. GitHub does not tolerate abuse. For more information on GitHub's policies, see our [Terms of Service](#) and [Community Guidelines](#).
