

Listing dependencies configured for version updates

In this article

Viewing dependencies monitored by Dependabot

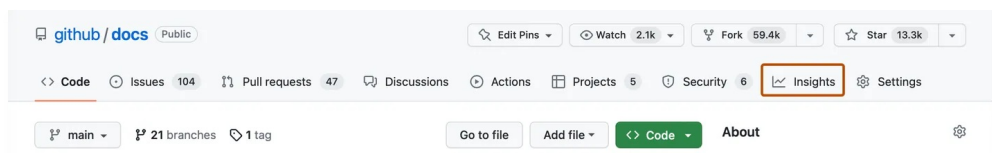

Viewing Dependabot log files

You can view the dependencies that Dependabot monitors for updates.

Viewing dependencies monitored by Dependabot [↗](#)

After you've enabled version updates, you can confirm that your configuration is correct using the **Dependabot** tab in the dependency graph for the repository. For more information, see "[Configuring Dependabot version updates](#)."

- 1 On GitHub.com, navigate to the main page of the repository.
- 2 Under your repository name, click  **Insights**.

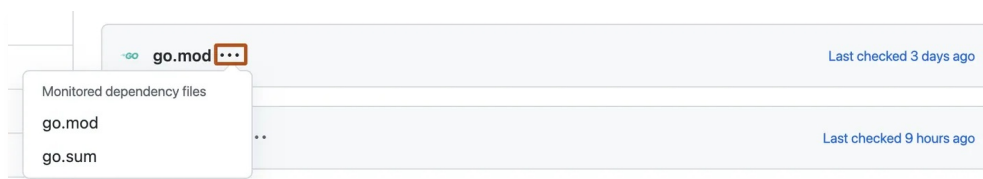

- 3 In the left sidebar, click **Dependency graph**.

4 Under "Dependency graph", click **Dependabot**.

5 Optionally, to view the files monitored for a package manager, to the right of the package manager, click ⋮.

If any dependencies are missing, check the log files for errors. If any package managers are missing, review the configuration file.
