Set up GitHub Copilot for Business for your organization or enterprise account and manage your subscription.

GitHub Copilot can be managed through personal accounts with GitHub Copilot for Individuals or through organization or enterprise accounts with GitHub Copilot for Business.

Note: If you are a member of your organization or enterprise, and you want to set up a GitHub Copilot for Business subscription, you will need to contact your organization or enterprise administrator.

About managing your GitHub Copilot for Business subscription

This article applies to setting up and managing a GitHub Copilot subscription for your organization or enterprise account. If you want to set up GitHub Copilot for your personal account, see "[Managing your GitHub Copilot subscription for your personal account](#)."

You can set up a Copilot for Business subscription for your organization or enterprise account. If you set up a subscription for your organization account, you can grant access to GitHub Copilot for individuals and teams within your organization. If you set up a subscription for your enterprise account, you can grant access to GitHub Copilot for organizations within your enterprise.

For more information about billing in general, like adding a payment method or viewing your payment history, see "[Managing your GitHub billing settings](#)."

Setting up a Copilot for Business subscription for your enterprise

Before you can start using Copilot for Business in your enterprise, you will need to set up a subscription.

Customers under a Microsoft Enterprise Agreement

As a customer under a Microsoft Enterprise Agreement, you need to connect your Azure subscription ID to your enterprise account to enable and pay for GitHub Copilot, see "[Connecting an Azure subscription](#)."

Customers under a direct GitHub contract

- 1 Go to the [GitHub Copilot for Business sign up page](#).
- 2 To purchase GitHub Copilot for your enterprise, select **Enable GitHub Copilot at an enterprise level** and click **Continue**.
- 3 Select the enterprise for which you want to purchase GitHub Copilot and click **Continue**.
- 4 Follow the steps to confirm your payment details, then click **Save**.

If you don't have a payment method on file, you'll be prompted to add one.

Modifying your Copilot for Business subscription

You can modify your Copilot for Business subscription for your organization or for your enterprise account.

Modifying your Copilot for Business settings for your enterprise

Note: Only enterprise owners can modify policies for GitHub Copilot.

You can modify the policies for the use of GitHub Copilot suggestions that match public code in your enterprise, and the access to your GitHub Copilot subscription. For more information, see "[Enforcing policies for GitHub Copilot in your enterprise](#)."

Modifying your Copilot for Business settings for your organization

You can configure GitHub Copilot in your organization, including granting and revoking access to individuals and teams, and determining whether to block suggestions that match public code. For more information, see "[Managing Copilot for Business](#)."

Canceling your Copilot for Business subscription

You can either disable GitHub Copilot for all organizations in your enterprise or for a specific organization.

Canceling your Copilot for Business subscription for your enterprise account

Note: You must be an enterprise owner to disable Copilot for Business for all organizations in your enterprise.

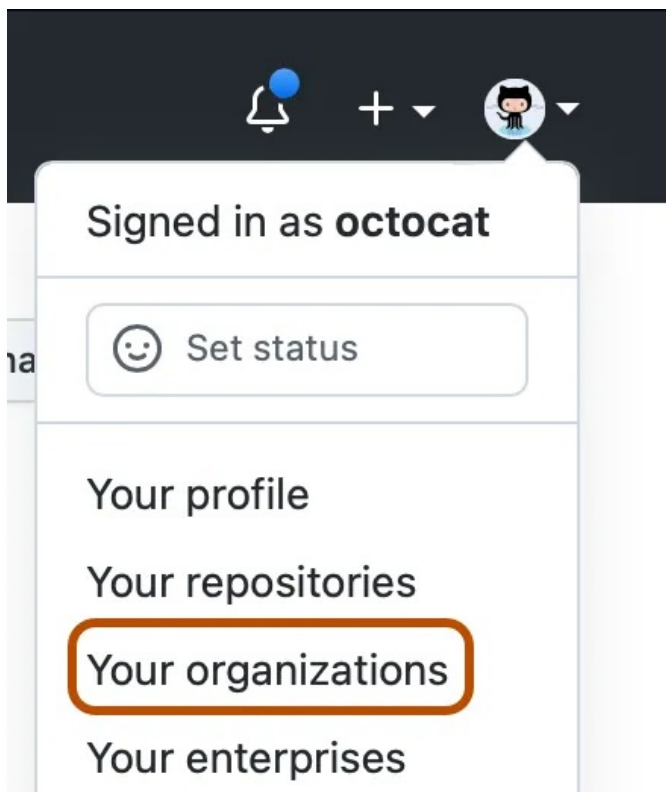

To cancel your Copilot for Business subscription for your enterprise account, you need to disable GitHub Copilot for all organizations in your enterprise.

- 1 In the enterprise account sidebar, click  **Policies**.
- 2 Under " Policies", click **Copilot**.
- 3 Under "Manage organization access to GitHub Copilot," select **Disabled** to disable GitHub Copilot for all organizations in your enterprise.
- 4 Click **Save**.

Canceling your Copilot for Business subscription for your organization account

To cancel your Copilot for Business subscription for your organization account, you need to remove all assigned GitHub Copilot seats.

- 1 In the top right corner of GitHub.com, click your profile photo, then click  **Your organizations**.

- 2 Next to the organization, click **Settings**.
- 3 In the "Code planning, and automation" section of the sidebar, click  **Copilot**, and then click **Access**.
- 4 Under "Copilot in your organization," to revoke GitHub Copilot access for all users in your organization, select **Disabled**.
- 5 In the "Confirm seat removal" dialog, click **Remove seats**.
