

# Viewing committer information for GitHub Advanced Security

## In this article

About the "Advanced Security Committers" dashboard

Viewing committer information

Calculating the cost to add committers

You can view information about the GitHub Advanced Security committers for your enterprise and calculate the cost for additional committers with the site admin dashboard.

## Who can use this feature

Site administrators can view committer information for GitHub Advanced Security.

GitHub Advanced Security is available for enterprise accounts on GitHub Enterprise Cloud and GitHub Enterprise Server. For more information, see "[GitHub's plans](#)."

For information about GitHub Advanced Security for Azure DevOps, see [Configure GitHub Advanced Security for Azure DevOps](#) in Microsoft Learn.

## About the "Advanced Security Committers" dashboard

You can estimate the number of licenses your enterprise might need for GitHub Advanced Security with the "Advanced Security Committers" section of the site admin dashboard.

If you currently use GitHub Advanced Security, this tool helps you understand how many committers are currently using licenses. It also helps you estimate how many additional licenses would be used if you enable GitHub Advanced Security for more organizations and repositories.

If you're considering using GitHub Advanced Security, you can use this tool to estimate potential costs to enable GitHub Advanced Security.

For more information about billing for Advanced Security, see "[About billing for GitHub Advanced Security](#)."

## Viewing committer information

- 1 In the upper-right corner of any page, click .
- 2 In the left sidebar, click **Advanced Security Committers**.
- 3 To the right of "Current active committer count", view the number of active committers for repositories with GitHub Advanced Security enabled. This is the

number of licenses that are currently being used.

- 4 To the right of "Total billable committers if GHAS is enabled for all repositories", you can see the number of active committers across all the repositories in your enterprise. This is the number of licenses that would be used if you enabled GitHub Advanced Security for every repository in your enterprise.

## Calculating the cost to add committers

---

Under "Calculate Additional Advanced Committers", you can calculate how many more new or additional licenses will be used if you enable GitHub Advanced Security for specific organizations and repositories.

- 1 In the upper-right corner of any page, click .
- 2 In the left sidebar, click **Advanced Security Committers**.
- 3 Under "Organizations and Repositories", enter or paste a list of organizations and repositories, with one organization or repository per line. For example:

```
example-org  
octo-org/octo-repo
```

- 4 Click **Recalculate**.
