

# Organizing your work with projects (classic)

Use projects (classic) to manage your work on GitHub

## Notes:

- Projects, the all-new projects experience, is now available. For more information about Projects, see "[About Projects](#)."
- You can only create a new classic project board for an organization, repository, or user that already has at least one classic project board. If you're unable to create a classic project board, create a project instead.
