---

Organization members and outside collaborators can request that an owner approve access to organization resources for OAuth apps.

## About requesting organization approval for an OAuth app

Organization members can always request owner approval for OAuth apps they'd like to use, and organization owners receive a notification of pending requests. Outside collaborators can request owner approval for OAuth apps they'd like to use if integration access requests are enabled. For more information, see "[Limiting OAuth app and GitHub App access requests](#)."

## Requesting organization approval for an OAuth app you've already authorized for your personal account

- 1 In the upper-right corner of any page, click your profile photo, then click **Settings**.

2 In the "Integrations" section of the sidebar, click **Applications**.

3 Click the **Authorized OAuth Apps** tab.

## Applications

Installed GitHub Apps

Authorized GitHub Apps

Authorized OAuth Apps

GitHub Apps augment and extend your workflows on GitHub with commercial, open source, and homegrown tools.

4 In the list of applications, click the name of the OAuth app you'd like to request access for.

5 Next to the organization you'd like the OAuth app to access, click **Request access**.

6 After you review the information about requesting OAuth app access, click **Request approval from owners**.
