Configuring a default editor [↗](#)

- 1 In the menu bar, select **GitHub Desktop**, then click **Preferences**.

- 2 In the Preferences window, select **Integrations**.

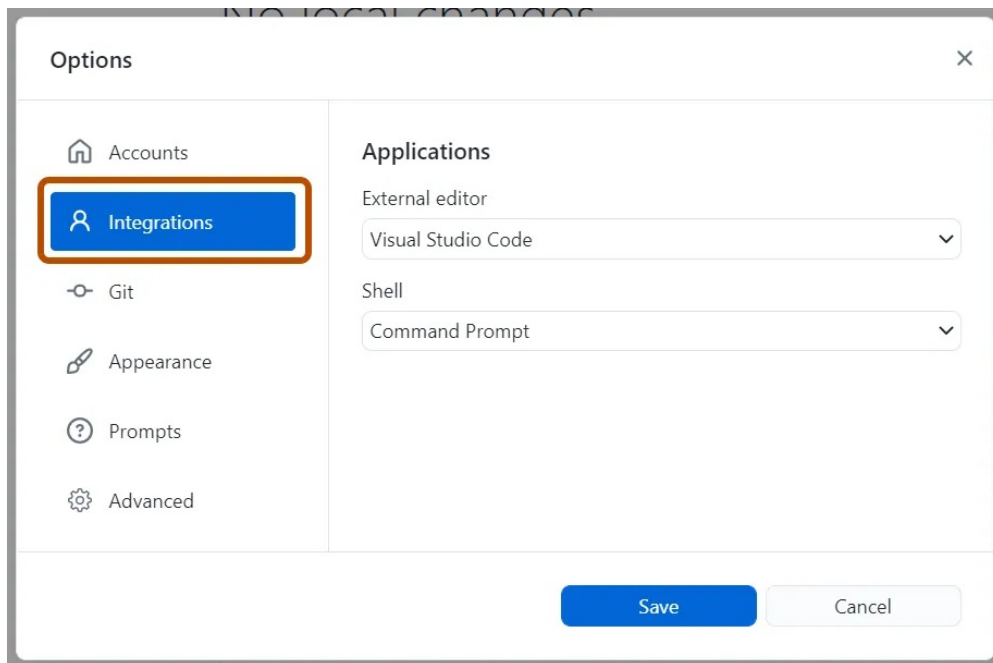

3 Under "External Editor", use the dropdown menu to select the editor you want to set as your default.

4 Click **Save**.

1 Use the **File** menu, then click **Options**.

2 In the Options window, select **Integrations**.

- 3 Under "External Editor", use the dropdown menu to select the editor you want to set as your default.
- 4 Click **Save**.

Opening a repository in the default editor [🔗](#)

To open the current repository in the default editor, you can use the menu bar:

- 1 In the menu bar, select **Repository**.
- 2 Click **Open in default editor**

If you want to open another repository in the default editor, you can use the repository list.

- 1 In the upper-left corner of GitHub Desktop, to the right of the current repository name, click ▾.
- 2 Right-click the repository, then click **Open in default editor**.

Tip: You can use the `Shift + Command + A` keyboard shortcut to open a repository in the default editor.

Tip: You can use the `Ctrl + Shift + A` keyboard shortcut to open a repository in the default editor.

Opening a file in the default editor [🔗](#)

- 1 Navigate to the "Changes" tab in the left sidebar.
- 2 Double-click on the file, or right-click on the file and select **Open in default editor**.
