

# Denying access to a previously approved OAuth app for your organization

If an organization no longer requires a previously authorized OAuth app, owners can remove the application's access to the organization's resources.

- 1 In the top right corner of GitHub.com, click your profile photo, then click  **Your organizations**.

- 2 Next to the organization, click **Settings**.
- 3 In the "Integrations" section of the sidebar, click  **OAuth application policy**.
- 4 Next to the application you'd like to disable, click .

## Third-party application access policy

Policy: **Access restricted** ✓

Only approved applications can access data in this organization. Applications owned by **octo-org** always have access.

[Remove restrictions](#)

 GraphQL API Explorer ...

✓ Approved 

5 Click **Deny access**.
