Viewing people with access to your repository

Exporting a list of people with access to your repository

You can view and export a list of people with access to a repository within an organization.

Who can use this feature

Organization owners can view people with access to a repository.

About the list of people with access to your repository

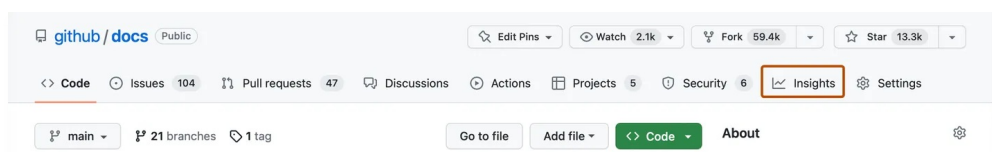

You can use this information to help off-board people, gather data for compliance, and other general security checkups.

Viewing people with access to your repository

You can see a combined overview of teams and people with access to your repository in your repository settings. For more information, see "[Managing teams and people with access to your repository](#)."

Exporting a list of people with access to your repository

- 1 On your GitHub Enterprise Server instance, navigate to the main page of the repository.
- 2 Under your repository name, click **Insights**.

- 3 At the bottom of the left sidebar, click **People**.
- 4 Above the list of people, click **Export CSV**.
