

# Setting up your repository for GitHub Codespaces

You can set up your repository to make it easy for people to work on a project using GitHub Codespaces.

---

## Facilitating quick creation and resumption of codespaces

You can add a link to take people straight to a page for creating a codespace, with your choice of options preconfigured. Alternatively you can link to the "Resume codespace" page.

---

## Setting up a template repository for GitHub Codespaces

You can help people get started with a project by setting up a template repository for use with GitHub Codespaces.

---
