

The REST API is now versioned. For more information, see "[About API versioning](#)."

# Organizations

Use the REST API to control and manage all your GitHub Enterprise Cloud organizations.

## [Organizations](#)

[List organizations](#)

[Get an organization](#)

[Update an organization](#)

[Delete an organization](#)

[Get the audit log for an organization](#)

[List SAML SSO authorizations for an organization](#)

[Remove a SAML SSO authorization for an organization](#)

[List app installations for an organization](#)

[Enable or disable a security feature for an organization](#)

[List organizations for the authenticated user](#)

[List organizations for a user](#)

## [Blocking users](#)

[List users blocked by an organization](#)

[Check if a user is blocked by an organization](#)

[Block a user from an organization](#)

[Unblock a user from an organization](#)

## [Custom Repository Roles](#)

[Deprecated - List custom repository roles in an organization](#)

[List custom repository roles in an organization](#)

[Create a custom repository role](#)

[Get a custom repository role](#)

[Update a custom repository role](#)

[Delete a custom repository role](#)

[Deprecated - Create a custom role](#)

[Deprecated - Get a custom role](#)

[Deprecated - Update a custom role](#)

[Deprecated - Delete a custom role](#)

[Deprecated - List fine-grained permissions for an organization](#)

[List repository fine-grained permissions for an organization](#)

## [Organization members](#)

[List failed organization invitations](#)

[List pending organization invitations](#)

[Create an organization invitation](#)

[Cancel an organization invitation](#)

[List organization invitation teams](#)

[List organization members](#)

[Check organization membership for a user](#)

[Remove an organization member](#)

[Get organization membership for a user](#)

[Set organization membership for a user](#)

[Remove organization membership for a user](#)

[List public organization members](#)

[Check public organization membership for a user](#)

[Set public organization membership for the authenticated user](#)

[Remove public organization membership for the authenticated user](#)

[List organization memberships for the authenticated user](#)

[Get an organization membership for the authenticated user](#)

[Update an organization membership for the authenticated user](#)

## [Outside Collaborators](#)

[List outside collaborators for an organization](#)

[Convert an organization member to outside collaborator](#)

[Remove outside collaborator from an organization](#)

## [Personal access tokens](#)

[List requests to access organization resources with fine-grained personal access tokens](#)

[Review requests to access organization resources with fine-grained personal access tokens](#)

[Review a request to access organization resources with a fine-grained personal access token](#)

[List repositories requested to be accessed by a fine-grained personal access token](#)

[List fine-grained personal access tokens with access to organization resources](#)

[Update the access to organization resources via fine-grained personal access tokens](#)

[Update the access a fine-grained personal access token has to organization resources](#)

[List repositories a fine-grained personal access token has access to](#)

## [Properties](#)

[Get all custom properties for an organization](#)

[Create or update custom properties for an organization](#)

[Get a custom property for an organization](#)

[Create or update a custom property for an organization](#)

[Remove a custom property for an organization](#)

[List custom property values for organization repositories](#)

[Create or update custom property values for organization repositories](#)

## [Rule Suites](#)

[List organization rule suites](#)

[Get an organization rule suite](#)

## [Rules](#)

[Get all organization repository rulesets](#)

[Create an organization repository ruleset](#)

[Get an organization repository ruleset](#)

[Update an organization repository ruleset](#)

[Delete an organization repository ruleset](#)

## [Security Managers](#)

[List security manager teams](#)

[Add a security manager team](#)

[Remove a security manager team](#)

## [Organization webhooks](#)

[List organization webhooks](#)

[Create an organization webhook](#)

[Get an organization webhook](#)

[Update an organization webhook](#)

[Delete an organization webhook](#)

[Get a webhook configuration for an organization](#)

[Update a webhook configuration for an organization](#)

[List deliveries for an organization webhook](#)

[Get a webhook delivery for an organization webhook](#)

[Redeliver a delivery for an organization webhook](#)

[Ping an organization webhook](#)
