

Applying for publisher verification for your organization

In this article

Requesting publisher verification

Further reading

To offer paid plans for your app or to include a marketplace badge in your app listing, you must complete the publisher verification process for your organization.

Note: This article applies to publishing GitHub Apps in GitHub Marketplace only. For more information about publishing GitHub Actions in GitHub Marketplace, see "[Publishing actions in GitHub Marketplace](#)."

Publisher verification ensures that GitHub has a way to contact you, that you've enabled two-factor authentication for your organization, and that your organization's domain has been verified.

Once your organization has been verified, you can publish paid plans for your app. For information, see "[Setting pricing plans for your listing](#)."

To offer paid plans for your app, the app must be owned by an organization and you must have owner permissions in the organization. If your app is currently owned by a personal account, you'll need to transfer the ownership of the app to an organization. For more information, see "[Transferring ownership of a GitHub App](#)" or "[Transferring ownership of an OAuth app](#)."

Requesting publisher verification

- 1 In the top right corner of GitHub.com, click your profile photo, then click  **Your organizations**.

- 2 Next to the organization, click **Settings**.
- 3 At the bottom of the left sidebar, click **Developer settings**.
- 4 Under "Developer settings", click **Publisher Verification**.
- 5 Under "Publisher Verification", complete the information in the checklist:
 - Ensure that your basic profile information is present and accurate. Also, make sure that you've included the best email address for support and updates from GitHub.
 - Ensure that Two-factor authentication is enabled for your organization. For more information, see "[Requiring two-factor authentication in your organization](#)."
 - Submit a verified domain and ensure that a "Verified" badge displays on your organization's profile page. For related information, see "[Verifying or approving a domain for your organization](#)."
- 6 Click **Request Verification**. GitHub will review your details and let you know once your publisher verification is complete.
