

Prioritizing Dependabot alerts with Dependabot alert rules

You can use Dependabot alert rules to auto-triage Dependabot alerts.

Note: Dependabot alert rules are currently in beta and are subject to change.

About Dependabot alert rules

You can use Dependabot alert rules to auto-triage alerts, so you can reduce false positives and better prioritize the alerts that you're interested in.

Using GitHub-curated alert rules to prioritize Dependabot alerts

You can use a GitHub-curated alert rule to auto-dismiss low impact development alerts for npm dependencies.

Customizing alert rules to prioritize Dependabot alerts

You can create your own alert rules to auto-triage alerts.

Managing alerts that have been automatically dismissed by an alert rule

You can filter to see which alerts have been auto-dismissed by an alert rule, and you can reopen dismissed alerts.
