

# Run student code in an IDE

## In this article

About student code and IDEs

Running student code in the IDE

---

You can run the code from a student assignment within the integrated development environment (IDE) that you configured for the assignment.

## About student code and IDEs

---

If you configure an integrated development environment (IDE) for an assignment, you can run the code within the IDE. You don't need to clone the assignment repository to your computer.

For more information about IDEs, see "[Integrate GitHub Classroom with an IDE](#)."

## Running student code in the IDE

---

- 1 Sign into [GitHub Classroom](#).
- 2 In the list of classrooms, click the classroom you want to view.
- 3 In the list of assignments, click the assignment you want to view.
- 4 To the right of the submission, click **View IDE**.
