

This version of GitHub Enterprise was discontinued on 2023-03-15. No patch releases will be made, even for critical security issues. For better performance, improved security, and new features, [upgrade to the latest version of GitHub Enterprise](#). For help with the upgrade, [contact GitHub Enterprise support](#).

Managing GitHub Mobile for your enterprise

In this article

About GitHub Mobile

Enabling or disabling GitHub Mobile

You can decide whether people can use GitHub Mobile to connect to your GitHub Enterprise Server instance.

Who can use this feature

Enterprise owners can manage GitHub Mobile for a GitHub Enterprise Server instance.

About GitHub Mobile

GitHub Mobile allows people to triage, collaborate, and manage work on your GitHub Enterprise Server instance from a mobile device after successful authentication. GitHub Mobile is available as an Android and iOS app. For more information, see "[GitHub Mobile](#)."

You can allow or disallow people from using GitHub Mobile to authenticate to your GitHub Enterprise Server instance and access your instance's data. By default, GitHub Mobile is enabled for people who use your GitHub Enterprise Server instance.

Note: If you upgrade to GitHub Enterprise Server 3.4.0 or later and have not previously disabled or enabled GitHub Mobile, GitHub Mobile will be enabled by default. If you previously disabled or enabled GitHub Mobile for your instance, your preference will be preserved upon upgrade. For more information about upgrading your instance, see "[Upgrading GitHub Enterprise Server](#)."

Enabling or disabling GitHub Mobile

- 1 From an administrative account on GitHub Enterprise Server, in the upper-right corner of any page, click .
- 2 If you're not already on the "Site admin" page, in the upper-left corner, click **Site admin**.
- 3 In the " Site admin" sidebar, click **Management Console**.
- 4 If prompted, type your Management Console password.
- 5 In the "Settings" sidebar, click **Mobile**.

6 Under "GitHub Mobile", select or deselect **Enable GitHub Mobile Apps**.

7 Under the "Settings" sidebar, click **Save settings**.

Note: Saving settings in the Management Console restarts system services, which could result in user-visible downtime.

8 Wait for the configuration run to complete.
