

Deleting a project (classic)

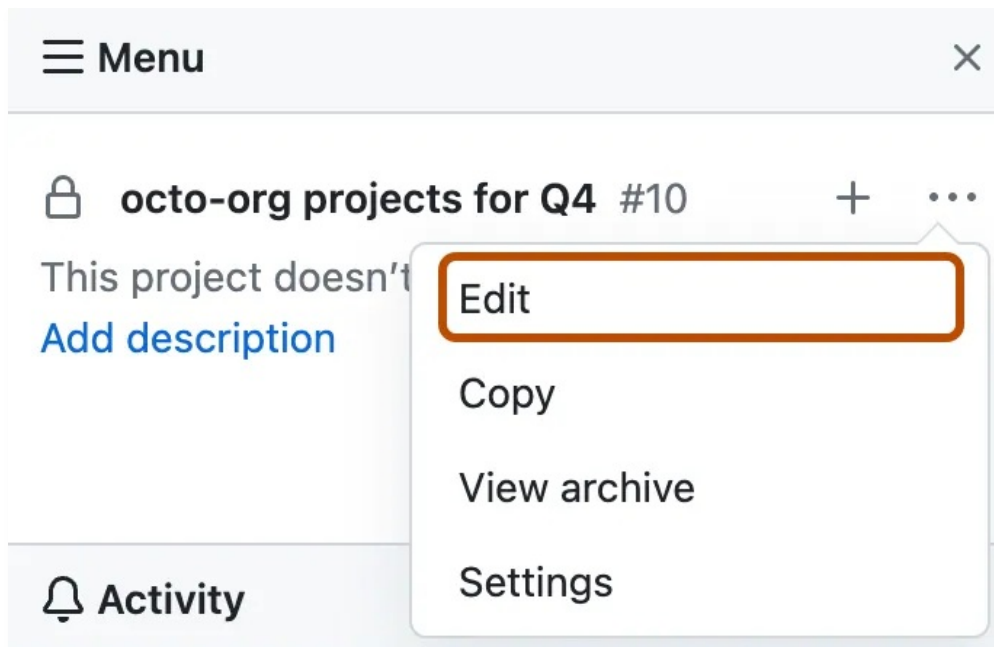

You can delete an existing classic project if you no longer need access to its contents.

Notes:

- Projects, the all-new projects experience, is now available. For more information about Projects, see "[About Projects](#)" and for information about migrating your classic project, see "[Migrating from projects \(classic\)](#)."
- You can only create a new classic project board for an organization or user that already has at least one classic project board. You cannot create new classic projects for repositories. If you're unable to create a classic project board, create a project instead.

Tip: If you'd like to retain access to a completed or unneeded classic project without losing access to its contents, you can [close the classic project](#) instead of deleting it.

- 1 Navigate to the classic project you want to delete.
- 2 On the top-right side of the classic project, click **Menu**.
- 3 Click ..., then click **Edit**.

- 4 Click **Delete project**.
- 5 To confirm that you want to delete the project board, click **OK**.
