

About billing on GitHub

In this article

- About billing on GitHub
- Included amounts by plan
- Managing billing settings
- Switching between settings for your different accounts

Your bill is a combination of charges for your subscriptions, including your account's plan, and usage-based billing.

About billing on GitHub [↗](#)

GitHub bills separately for each account. This means that you will receive a separate bill for your personal account and for each organization or enterprise account you own. For more information about account types, see "[Types of GitHub accounts](#)."

You can switch between the billing settings for each of your accounts by using the context switcher. For more information, see "[Switching between settings for your different accounts](#)."

The bill for each account is a combination of subscriptions and usage-based billing. Subscriptions include your account's plan, such as GitHub Pro or GitHub Team, as well as paid products that have a consistent monthly cost, such as GitHub Copilot and apps from GitHub Marketplace.

Usage-based billing applies when the cost of a paid product depends on how much you use the product. For example, the cost of GitHub Actions depends on how many minutes your jobs spend running and how much storage your artifacts use.

Your plan may come with included amounts of usage-based products. For example, with GitHub Pro, your personal account gets 3,000 minutes of GitHub Actions usage for free each month. You can control usage beyond the included amounts by setting spending limits.

Included amounts by plan [↗](#)

Product	Usage	GitHub Free	GitHub Pro	GitHub Free for organizations	GitHub Team	GitHub Enterprise Cloud
GitHub Actions	Storage	500 MB	1 GB	500 MB	2 GB	50 GB
	Minutes (per month)	2,000	3,000	2,000	3,000	50,000
GitHub Codespaces	Storage (per month)	15 GB	20 GB	None	None	None

	Core hours (per month)	120	180	None	None	None
GitHub Packages	Storage	500 MB	2 GB	500 MB	2 GB	50 GB
	Data transfer (per month)	1 GB	10 GB	1 GB	10 GB	100 GB
Git Large File Storage	Storage (per month)	1 GB	1 GB	1 GB	1 GB	1 GB
	Bandwidth (per month)	1 GB	1 GB	1 GB	1 GB	1 GB

Managing billing settings

You must manage billing settings, payment method, and paid features and products for each of your accounts separately. You can choose to pay monthly or yearly for each account. All subscriptions and usage-based billing associated with an account shares a billing date, payment method, and receipt.

You can pay for GitHub with a credit card or with a PayPal account. When you update the payment method for your account's plan, your new payment method is automatically added to your other subscriptions and usage-based billing.

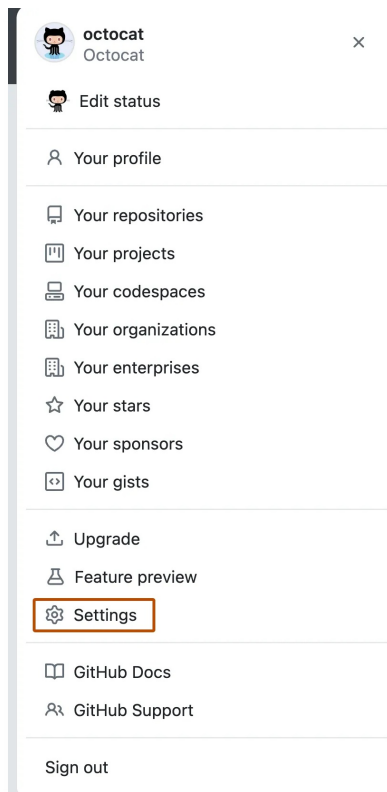

For qualifying usage-based services, you may choose to pay for the services from your GitHub account or from an Azure subscription. The terms of the billing method you choose will apply to services billed in this manner.

For more information, see "[Managing your GitHub billing settings](#)."

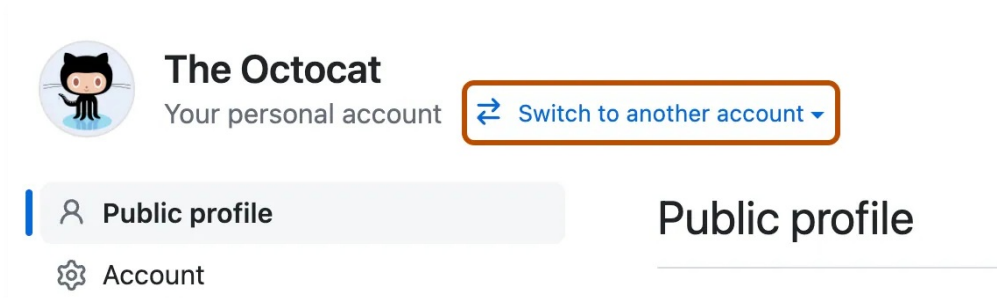

Switching between settings for your different accounts

If you're an organization or enterprise owner, you can switch between settings for your different accounts using the context switcher in your settings.

- 1 In the upper-right corner of any page, click your profile photo, then click **Settings**.

- 2 At the top of the page, to the right of your name, click **Switch to another account**.

- 3 Start typing the name of the account you want to switch to, then click the name of the account.
- 4 In the left sidebar, click **Billing and plans**.
