

Exploring user activity in your enterprise

You can view user and system activity by leveraging dashboards, webhooks and log forwarding.

Activity dashboard

The Activity dashboard gives you an overview of all the activity in your enterprise.

Viewing push logs

Site administrators can view a list of Git push operations for any repository on the enterprise.

Log forwarding

GitHub Enterprise Server uses `syslog-ng` to forward system and application logs to the server you specify.

Managing global webhooks

You can configure global webhooks to notify external web servers when events occur within your enterprise.
