

The REST API is now versioned. For more information, see "[About API versioning](#)."

# Pulls

Use the REST API to manage pull requests and pull request reviews.

## [Pulls](#)

[List pull requests](#)

[Create a pull request](#)

[Get a pull request](#)

[Update a pull request](#)

[List commits on a pull request](#)

[List pull requests files](#)

[Check if a pull request has been merged](#)

[Merge a pull request](#)

[Update a pull request branch](#)

## [Pull request review comments](#)

[List review comments in a repository](#)

[Get a review comment for a pull request](#)

[Update a review comment for a pull request](#)

[Delete a review comment for a pull request](#)

[List review comments on a pull request](#)

[Create a review comment for a pull request](#)

[Create a reply for a review comment](#)

## [Review requests](#)

[Get all requested reviewers for a pull request](#)

[Request reviewers for a pull request](#)

[Remove requested reviewers from a pull request](#)

## [Pull request reviews](#)

[List reviews for a pull request](#)

[Create a review for a pull request](#)

[Get a review for a pull request](#)

[Update a review for a pull request](#)

[Delete a pending review for a pull request](#)

[List comments for a pull request review](#)

[Dismiss a review for a pull request](#)

[Submit a review for a pull request](#)

[Submit a review for a pull request](#)
