About badges

Creating a custom badge

Next steps

You can replace the default badge on your GitHub App by uploading your own logo image and customizing the background.

About badges

Every GitHub App has a badge. A badge is a square image inside a circular background.

By default, a new GitHub App will use an automatically generated identicon as a badge. An identicon badge looks something like this:

After you register a GitHub App, you can customize your app's badge by uploading a logo and selecting a background color. Your logo should be a PNG, JPG, or GIF file under 1 MB in size. For the best quality rendering, we recommend an image dimension of 200 pixels by 200 pixels.

For more information about badges for GitHub Apps in GitHub Marketplace, see "[Writing a listing description for your app](#)." You can change a custom badge for a GitHub App that already has an approved Marketplace listing by navigating to <https://github.com/marketplace/manage>.

Creating a custom badge

- 1 In the upper-right corner of any page on GitHub, click your profile photo.
- 2 Navigate to your account settings.
 - For a GitHub App owned by a personal account, click **Settings**.
 - For a GitHub App owned by an organization:
 - a. Click **Your organizations**.
 - b. To the right of the organization, click **Settings**.

- 3 In the left sidebar, click <> **Developer settings**.
- 4 In the left sidebar, click **GitHub Apps**.
- 5 To the right of the GitHub App you want to modify, click **Edit**.
- 6 Under "Display information", drag and drop an image from a local folder or click **Upload a logo** to select an image from your computer.
- 7 Optionally, crop your image.
- 8 Click **Set new avatar**.
- 9 Under "Badge background color", type the hexadecimal color code of the background color for your badge.

Note: The "Badge background color" input field will only appear after you upload a logo.
