About organization removal

Removing an organization from your enterprise

Further reading

If an organization should no longer be a part of your enterprise, you can remove the organization.

Who can use this feature

Enterprise owners can remove any organization from their enterprise.

About organization removal [↗](#)

You can remove an organization that is owned by your enterprise account, so the organization stands alone.

Warning: When you remove an organization from your enterprise:

- Billing, identity management, 2FA requirements, and other policies for the organization will no longer be governed by your enterprise.
- The organization will be downgraded to the free plan.
- The organization will be governed by our standard Terms of Service.
- Any internal repositories within the organization will be converted to private repositories.

Removing an organization from your enterprise [↗](#)

- 1 In the top-right corner of GitHub.com, click your profile photo, then click **Your enterprises**.
- 2 In the list of enterprises, click the enterprise you want to view.
- 3 Under "Organizations", in the search bar, begin typing the organization's name until the organization appears in the search results.
- 4 To the right of the organization's name, select the  dropdown menu and click **Remove organization**.
