Signing up for a new account

Next steps

GitHub offers personal accounts for individuals and organizations for teams of people working together.

## About new accounts on GitHub.com

You can create a personal account, which serves as your identity on GitHub.com, or an organization, which allows multiple personal accounts to collaborate across multiple projects. For more information about account types, see "[Types of GitHub accounts](#)."

When you create a personal account or organization, you must select a billing plan for the account. For more information, see "[GitHub's plans](#)."

## Signing up for a new account

- 1 If you want to create a new personal account, make sure you are currently signed out of GitHub.
- 2 Go to GitHub's [Pricing](#) page.
- 3 Read the information about the different products and subscriptions that GitHub offers, then click the upgrade button under the subscription you'd like to choose.
- 4 Follow the prompts to create your personal account or organization.
