

Contributing to GitHub Docs documentation

Learn about how the GitHub Docs team creates documentation and how you can contribute.

Start here

About GitHub's documentation philosophy

Our documentation philosophy guides what content we create and how we create it.

Style guide

Follow this guide to make sure GitHub's documentation stays consistent and follows clear patterns that our readers can understand.

About the content model

The content model describes the structure and types of content that we publish.

About contributing to GitHub Docs

You can contribute to GitHub Docs content in several ways.

What's new [View all →](#)

Contributing to GitHub Docs

October 02

Docs are being translated to French, German, Korean, and Russian

December 05

Webhook docs generated from the OpenAPI schema

November 16
