About your submissions

Managing your submissions

You can manage the purpose, topics, and offers assigned to each of your repositories in the GitHub Community Exchange gallery, or delete your repository submissions.

About your submissions

During the GitHub Community Exchange submission process, you will choose a purpose, topics, and offers for your repository. Once a repository has been submitted to GitHub Community Exchange, it will be published with these details. For more information, see "[Submitting your repository to GitHub Community Exchange](#)."

After you've submitted, you can still edit the topics and offers associated with your repository. You can also update the purpose of your repository by changing the corresponding topic(s). For more information, see "[Classifying your repository with topics](#)."

The language associated with your repository is the primary language used and is automatically determined by GitHub. For more information, see "[About repository languages](#)."

The GitHub Community Exchange community moderates all repository submissions.

Managing your submissions

- 1 From your GitHub Global Campus dashboard, navigate to the GitHub Community Exchange home page.
- 2 Above the list of repositories, click the **Submissions** tab.
