[List app installations for an organization](#)

[Enable or disable a security feature for an organization](#)

[List organizations for the authenticated user](#)

[List organizations for a user](#)

[Custom Repository Roles](#)

[Deprecated - List custom repository roles in an organization](#)

[List custom repository roles in an organization](#)

[Create a custom repository role](#)

[Get a custom repository role](#)

[Update a custom repository role](#)

[Delete a custom repository role](#)

[List repository fine-grained permissions for an organization](#)

[Organization members](#)

[List organization members](#)

[Check organization membership for a user](#)

[Remove an organization member](#)

[Get organization membership for a user](#)

[Set organization membership for a user](#)

[Remove organization membership for a user](#)

[List public organization members](#)

[Check public organization membership for a user](#)

[Set public organization membership for the authenticated user](#)

[Remove public organization membership for the authenticated user](#)

[List organization memberships for the authenticated user](#)

[Get an organization membership for the authenticated user](#)

[Update an organization membership for the authenticated user](#)

[Outside Collaborators](#)

[List outside collaborators for an organization](#)

[Convert an organization member to outside collaborator](#)

[Remove outside collaborator from an organization](#)

[Personal access tokens](#)

[List requests to access organization resources with fine-grained personal access tokens](#)

[Review requests to access organization resources with fine-grained personal access tokens](#)

[Review a request to access organization resources with a fine-grained personal access token](#)

[List repositories requested to be accessed by a fine-grained personal access token](#)

[List fine-grained personal access tokens with access to organization resources](#)

[Update the access to organization resources via fine-grained personal access tokens](#)

[Update the access a fine-grained personal access token has to organization resources](#)

[List repositories a fine-grained personal access token has access to](#)

[Security Managers](#)

[List security manager teams](#)

[Add a security manager team](#)

[Remove a security manager team](#)

[Organization webhooks](#)

[List organization webhooks](#)

[Create an organization webhook](#)

[Get an organization webhook](#)

[Update an organization webhook](#)

[Delete an organization webhook](#)

[Get a webhook configuration for an organization](#)

[Update a webhook configuration for an organization](#)

[List deliveries for an organization webhook](#)

[Get a webhook delivery for an organization webhook](#)

[Redeliver a delivery for an organization webhook](#)

[Ping an organization webhook](#)
