

Troubleshooting SSH

When using SSH to connect and authenticate to GitHub Enterprise Server, you may need to troubleshoot unexpected issues that may arise.

[Recovering your SSH key passphrase](#)

[Error: Permission denied \(publickey\)](#)

[Error: Bad file number](#)

[Error: Key already in use](#)

[Error: Permission to user/repo denied to other-user](#)

[Error: Permission to user/repo denied to user/other-repo](#)

[Error: Agent admitted failure to sign](#)

[Error: ssh-add: illegal option -- apple-use-keychain](#)

[Error: Unknown key type](#)

[Error: We're doing an SSH key audit](#)
