

# Assigning issues and pull requests to other GitHub users

## In this article

About issue and pull request assignees

Assigning an individual issue or pull request

Assigning multiple issues or pull requests

Further reading

Assignees clarify who is working on specific issues and pull requests.

## Who can use this feature

Anyone with write access to a repository can assign issues and pull requests. Members of an enterprise with managed users can only make changes in repositories that are part of their enterprise.

## About issue and pull request assignees

You can assign multiple people to each issue or pull request, including yourself, anyone who has commented on the issue or pull request, anyone with write permissions to the repository, and organization members with read permissions to the repository. For more information, see "[Access permissions on GitHub](#)."

Issues and pull requests in public repositories, and in private repositories for a paid account, can have up to 10 people assigned. Private repositories on the free plan are limited to one person per issue or pull request.

## Assigning an individual issue or pull request

- 1 On GitHub.com, navigate to the main page of the repository.
- 2 Under your repository name, click  **Issues** or  **Pull requests**.

- 3 Open the issue or pull request that you want to assign to someone.
- 4 In the right side menu, click **Assignees**.

|                        |    |
|------------------------|----|
| <b>Assignees</b>       | ⚙️ |
| No one—assign yourself |    |
| <b>Labels</b>          | ⚙️ |
| None yet               |    |
| <b>Projects</b>        | ⚙️ |
| None yet               |    |
| <b>Milestone</b>       | ⚙️ |
| No milestone           |    |

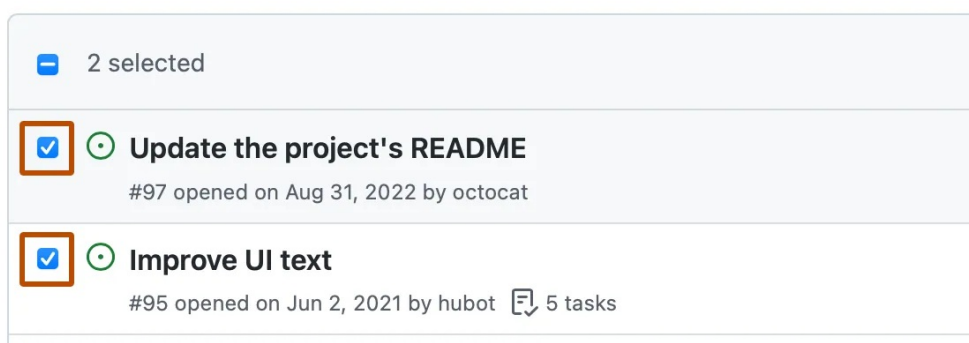

- To assign the issue or pull request to a user, start typing their username, then click their name when it appears. You can select and add up to ten assignees to an issue or pull request.

## Assigning multiple issues or pull requests [↗](#)

- On GitHub.com, navigate to the main page of the repository.
- Under your repository name, click  **Issues** or  **Pull requests**.

- Select the items you want to assign to someone.

- In the upper-right corner, click **Assign**.
- To assign the items to a user, start typing their username, then click their name when it appears. You can select and add up to ten assignees to an issue or pull

request.
