

Enforcing policies for your enterprise

You can configure policies for organizations in your enterprise.

About enterprise policies

With enterprise policies, you can manage the policies for all the organizations owned by your enterprise.

Enforcing repository management policies in your enterprise

You can enforce policies for repository management within your enterprise's organizations, or allow policies to be set in each organization.

Enforcing team policies in your enterprise

You can enforce policies for teams in your enterprise's organizations, or allow policies to be set in each organization.

Enforcing policies for projects in your enterprise

You can enforce policies for projects and classic projects within your enterprise's organizations, or allow policies to be set in each organization.

Restricting email notifications for your enterprise

You can prevent your enterprise's information from leaking into personal email accounts by restricting the domains where members can receive email notifications about activity in organizations owned by your enterprise.

Enforcing policies for security settings in your enterprise

You can enforce policies to manage security settings in your enterprise's organizations, or allow policies to be set in each organization.

Enforcing policies for GitHub Actions in your enterprise

You can enforce policies for GitHub Actions within your enterprise's organizations, or allow policies to be set in each organization.

Enforcing policies for code security and analysis for your enterprise

You can enforce policies to manage the use of code security and analysis features within your enterprise's organizations.

Enforcing policies for personal access tokens in your enterprise

Enterprise owners can control whether to allow fine-grained personal access tokens and personal access tokens (classic), and can require approval for fine-grained personal access tokens.
