

The REST API is now versioned. For more information, see "[About API versioning](#)."

Community metrics

Use the REST API to retrieve information about your community profile.

Get community profile metrics [↗](#)

✔ Works with [GitHub Apps](#)

Returns all community profile metrics for a repository. The repository cannot be a fork.

The returned metrics include an overall health score, the repository description, the presence of documentation, the detected code of conduct, the detected license, and the presence of `ISSUE_TEMPLATE`, `PULL_REQUEST_TEMPLATE`, `README`, and `CONTRIBUTING` files.

The `health_percentage` score is defined as a percentage of how many of the recommended community health files are present. For more information, see "[About community profiles for public repositories](#)."

`content_reports_enabled` is only returned for organization-owned repositories.

Parameters for "Get community profile metrics"

Headers

`accept` string

Setting to `application/vnd.github+json` is recommended.

Path parameters

`owner` string **Required**

The account owner of the repository. The name is not case sensitive.
