

Saving gists with stars

In this article

Starring a gist

Viewing your starred gists

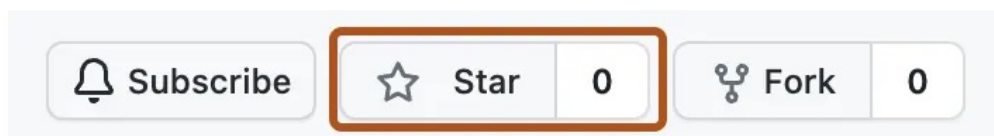

Further reading

You can star gists to keep track of projects you find interesting.

Starring a gist [↗](#)

You can star a gist to add it to the "Starred" page. Starring makes it easy to find a gist again later.

- 1 Navigate to Discover, `http(s)://[hostname]/gist/discover` or `http(s)://gist.[hostname]/discover` if subdomains are enabled and select the gist you want to star.
- 2 To star the gist, click ☆ **Star** in the top-right corner of the page.

- 3 Optionally, to unstar a previously starred gist, click ★ **Unstar**. This will remove the gist from your starred list.

Viewing your starred gists [↗](#)

Starring makes it easy to find a gist again later. You can see all the gists starred by going to your Gist starred page, `http(s)://[hostname]/gist/starred` or `http(s)://gist.[hostname]/starred` if subdomains are enabled.
