Downloading metrics from your enterprise account

Downloading metrics from your organization

You can use your own tools to analyze your GitHub Enterprise Server usage over time by downloading your Server Statistics metrics in a CSV or JSON file.

You can download up to the last 365 days of Server Statistics data in a CSV or JSON file. This data, which includes aggregate metrics on repositories, issues, and pull requests, can help you anticipate the needs of your organization, understand how your team works, and show the value you get from GitHub Enterprise Server.

Before you can download this data, you must enable Server Statistics. For more information, see "[Enabling Server Statistics for your enterprise](#)."

To preview the metrics available to download, see "[About Server Statistics](#)."

To download these metrics, you must be an enterprise owner or organization owner on GitHub Enterprise Cloud.

- If your GitHub Enterprise Server instance is connected to an enterprise account on GitHub Enterprise Cloud, see "[Downloading metrics from your enterprise account](#)."
- If your GitHub Enterprise Server instance is connected to an organization on GitHub Enterprise Cloud, see "[Downloading metrics from your organization](#)."

To learn more about GitHub Connect, see "[About GitHub Connect](#)."

Downloading metrics from your enterprise account

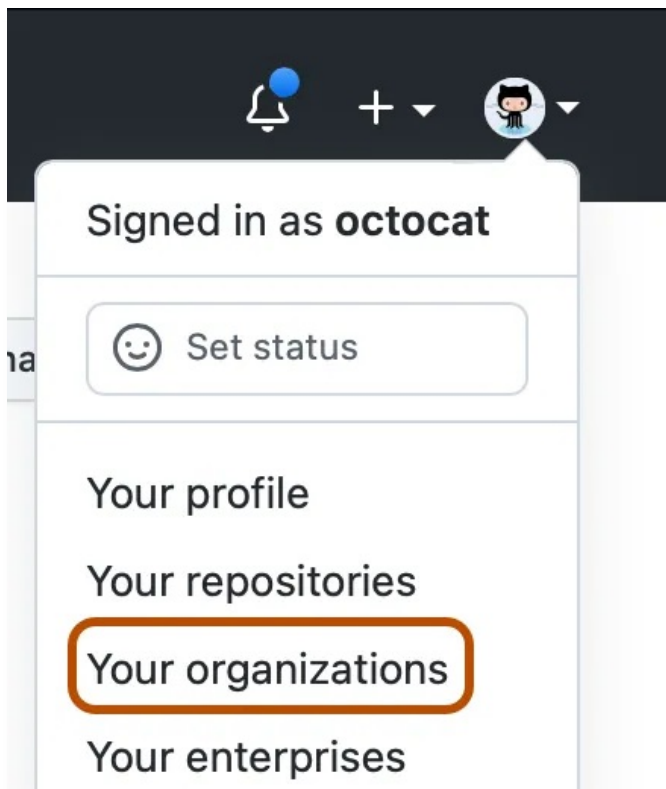

- 1 In the top-right corner of GitHub Enterprise Server, click your profile photo, then click **Enterprise settings**.

- 2 In the enterprise account sidebar, click **GitHub Connect**.
- 3 To start your download, next to "Server Statistics", select the **Export** dropdown menu, then choose whether you want to download a JSON or CSV file.

Downloading metrics from your organization [🔗](#)

- 1 In the top right corner of GitHub Enterprise Server, click your profile photo, then click **Your organizations**.

- 2 Next to the organization, click **Settings**.
- 3 In the left sidebar, click **GitHub Connect**.
- 4 To start your download, next to "Server Statistics", select the **Export** dropdown menu, then choose whether you want to download a JSON or CSV file.
