Unblocking a user in your account settings

Unblocking a user from their profile page

Further reading

If you've mended fences with a GitHub user you've blocked, you can unblock their account.

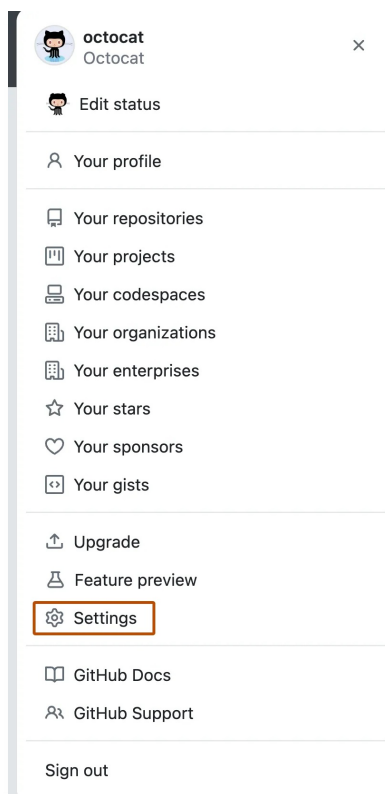

When you unblock a user, they'll be able to invite you to be a collaborator to their repositories. If they [@mention you](#) anywhere on GitHub, you'll receive notifications.

In repositories you own, the user will be able to collaborate normally.

You can unblock a user in your account settings or from the user's profile page.

Unblocking a user in your account settings

- 1 In the upper-right corner of any page, click your profile photo, then click **Settings**.

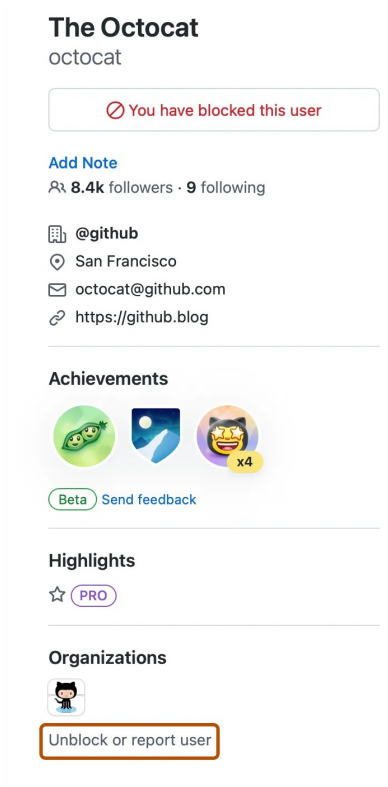

- 2 In the "Access" section of the sidebar, select  **Moderation** then click **Blocked users**.

- Under "Blocked users", next to the user you'd like to unblock, click **Unblock**.

Unblocking a user from their profile page [↗](#)

- Visit the user's profile page.
- In the left sidebar, below the user's profile information, click **Unblock or report user**.

- Click **Unblock user**.

Tip: Settings that were removed when you blocked the user, such as collaborator status, stars, and follows, are not restored when you unblock the user.
