

Configuring team notifications

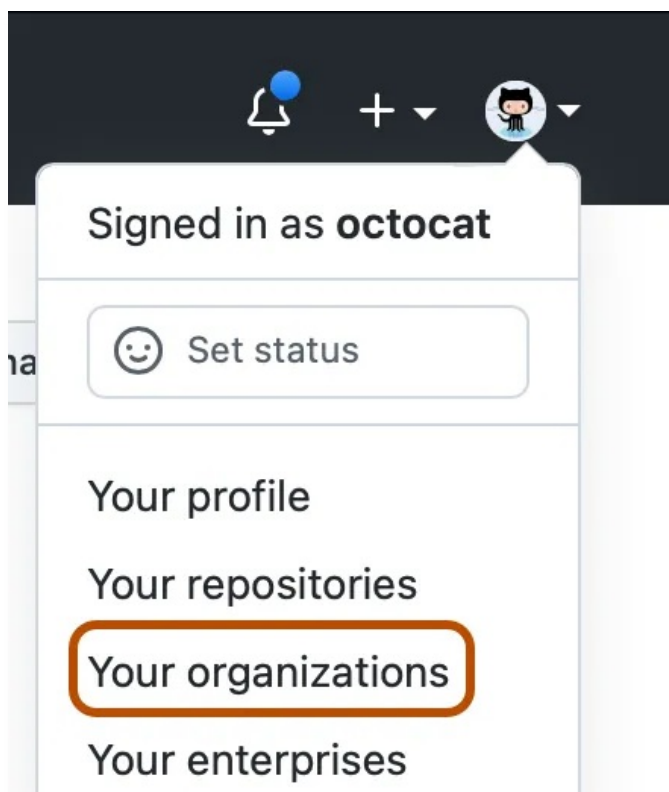

Team maintainers and organization owners can configure notifications for specific teams.

Team maintainers and organization owners can enable or disable notifications for specific teams. When notifications are enabled, members of the team will receive notifications when the team is mentioned in an issue, pull request, or comment.

Disabling team notifications won't unsubscribe people that are already subscribed to threads.

Note: This setting does not affect notifications for reviews requested from the team.

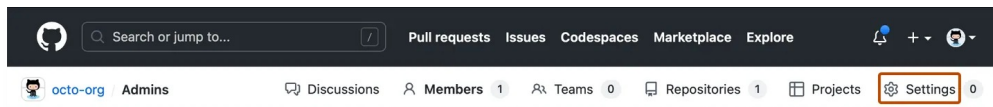

- 1 In the top right corner of GitHub.com, click your profile photo, then click  **Your organizations**.

- 2 Click the name of your organization.
- 3 Under your organization name, click  **Teams**.

- 4 In the list of teams, click the name of the team whose parent you'd like to change.
- 5 At the top of the team page, click ⚙️ **Settings**.

- 6 Under "Team notifications", select **Enabled** or **Disabled**.

Note: This setting only applies to @mentions of the team name. This setting does not affect notifications for reviews requested from the team.

- 7 Click **Save changes**.
