

Viewing your GitHub Copilot usage

In this article

- About your GitHub Copilot usage
- Viewing your usage of GitHub Copilot for Business

You can view how many users have access to GitHub Copilot across all the organizations in your enterprise.

Who can use this feature

Enterprise owners can view usage for GitHub Copilot in their enterprise.

GitHub Copilot can be managed through personal accounts with GitHub Copilot for Individuals or through organization or enterprise accounts with GitHub Copilot for Business.

About your GitHub Copilot usage

You can view usage information for GitHub Copilot for Business in your enterprise, broken down by organization, or in your organization, broken down by seat assignment status. At the enterprise level, this information includes the number of seats assigned in each organization, and the total spending associated with each organization, for the current billing cycle. At the organization level, this information includes the total number of seats, seats carried over from the previous billing cycle, new seats added during the current cycle, and seats to be removed at the end of the current cycle.

Viewing your usage of GitHub Copilot for Business

At the enterprise-level

- 1 In the enterprise account sidebar, click **Settings**.
- 2 Under **Settings**, click **Billing**.
- 3 Under "Copilot monthly usage," view the breakdown of your GitHub Copilot usage.

Copilot monthly usage

ORGANIZATION	SEAT USAGE	SPENDING
 octo-org	3.2903 seats	\$62.52
+2 organizations not using Copilot.		

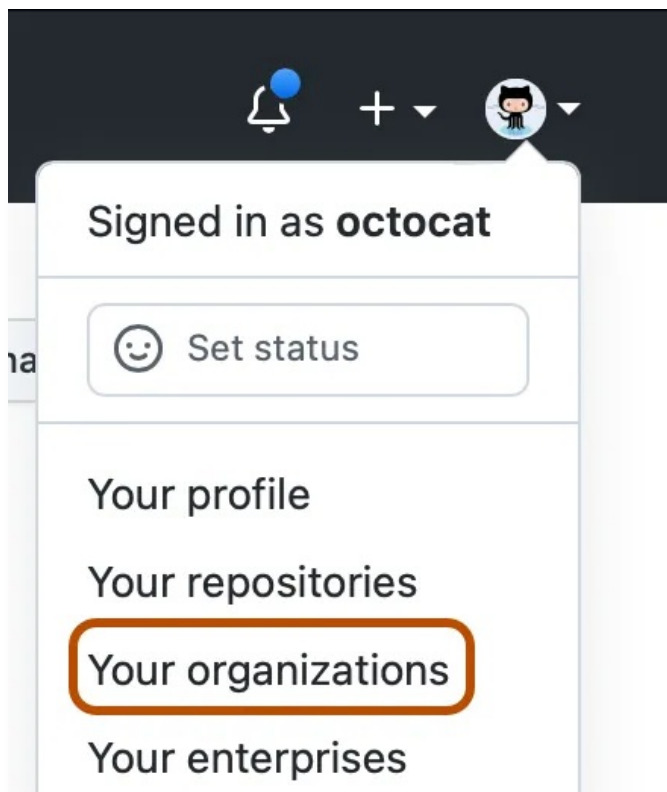

The figures represent the billed seats so far for the current billing cycle. The seat usage so far this month is calculated as the number of seats, divided by the number

of days in the current billing cycle, multiplied by the days elapsed so far in the billing cycle. So, if you have 5 seats assigned from the beginning of the billing cycle, and the current cycle is 30 days long, and it's the 10th day of the cycle, this figure will be 1.6666. On day 20, it will be 3.3333 and on the last day of the cycle, it will be 5.

The total spending for each organization for the current cycle will usually be the number of seats assigned, multiplied by the cost per seat (\$19 USD per seat per month for GitHub Copilot for Business). However, if the same organization member is assigned a seat in multiple organizations, their seat usage will be included for each organization, but the enterprise will only be charged once. The cost for this person will only be included in the organization where they were first assigned a seat.
