

The REST API is now versioned. For more information, see "About API versioning."

Organization announcement banners

The Organization Announcement Banners API allows you to get, set, and remove the announcement banner for your organization.

Get announcement banner for organization [↗](#)

✔ Works with [GitHub Apps](#)

Gets the announcement banner currently set for the organization. Only returns the announcement banner set at the organization level. Organization members may also see an enterprise-level announcement banner. To get an announcement banner displayed at the enterprise level, use the enterprise-level endpoint.

Parameters for "Get announcement banner for organization"

Headers

accept string
Setting to `application/vnd.github+json` is recommended.

Path parameters

org string **Required**
The organization name. The name is not case sensitive.

HTTP response status codes for "Get announcement banner for organization"

Status code	Description
200	OK

Code samples for "Get announcement banner for organization"

GET /orgs/{org}/announcement

cURL

JavaScript

GitHub CLI

Copy

```
curl -L \ -H "Accept: application/vnd.github+json" \ -H "Authorization: Bearer <YOUR-TOKEN>" \ -H "X-GitHub-API-Version: 2022-11-28" \ https://api.github.com/orgs/ORG/announcement
```

Announcement banner

Example response

Response schema

Status: 200

```
{ "announcement": "Very **important** announcement about _something_.", "expires_at": "2021-01-01T00:00:00.000+00:00", "user_dismissible": false }
```

Set announcement banner for organization [↗](#)

✔ Works with [GitHub Apps](#)

Sets the announcement banner to display for the organization.

Parameters for "Set announcement banner for organization"

Headers

accept string
Setting to `application/vnd.github+json` is recommended.

Path parameters

org string **Required**
The organization name. The name is not case sensitive.

Body parameters

announcement string or null **Required**
The announcement text in GitHub Flavored Markdown. For more information about GitHub Flavored Markdown, see "[Basic writing and formatting syntax](#)."

expires_at string or null
The time at which the announcement expires. This is a timestamp in [ISO 8601](#) format: `YYYY-MM-DDTHH:MM:SSZ` . To set an announcement that never expires, omit this parameter, set it to `null` , or set it to an empty string.
