

This version of GitHub Enterprise was discontinued on 2023-03-15. No patch releases will be made, even for critical security issues. For better performance, improved security, and new features, [upgrade to the latest version of GitHub Enterprise](#). For help with the upgrade, [contact GitHub Enterprise support](#).

Managing access to the Management Console

You can access the Management Console as well as configure Management Console authentication rate limits.

About access to the Management Console [↗](#)

From the Management Console, you can initialize, configure, and monitor your GitHub Enterprise Server instance. For more information, see "[About the Management Console](#)."

You can access the Management Console using the Management Console password. An administrator created the password during the initial setup process for your GitHub Enterprise Server instance. For more information about Management Console access, see "[Administering your instance from the Management Console](#)."
