

About your organization's profile

Your organization's profile page shows basic information about your organization.

You can optionally choose to add a description, location, website, and email address for your organization, and pin important repositories. You can customize your organization's public profile by adding a README.md file. For more information, see "[Customizing your organization's profile](#)."

Organizations that use GitHub Enterprise Cloud can confirm their organization's identity and display a "Verified" badge on their organization's profile page by verifying the organization's domains with GitHub. For more information, see "[Verifying or approving a domain for your organization](#)" in the GitHub Enterprise Cloud documentation.
