

Managing your membership in organizations

If you're a member of an organization, you can publicize or hide your membership, view other people's roles, and remove yourself from the organization.

About organization membership

You can become a member of an organization to collaborate with coworkers or open-source contributors across many repositories at once.

Accessing an organization

To access an organization that you're a member of, you must sign in to your personal account.

Viewing people's roles in an organization

You can view a list of the people in your organization and filter by their role. For more information on organization roles, see "[Roles in an organization](#)."

Requesting organization approval for OAuth apps

Organization members and outside collaborators can request that an owner approve access to organization resources for OAuth apps.

Publicizing or hiding organization membership

If you'd like to tell the world which organizations you belong to, you can display the avatars of the organizations on your profile.

Managing your scheduled reminders

Get reminders in Slack when you or your team have pull requests waiting for review.

Removing yourself from an organization

If you're an outside collaborator or a member of an organization, you can leave the organization at any time.
