

This version of GitHub Enterprise was discontinued on 2023-03-15. No patch releases will be made, even for critical security issues. For better performance, improved security, and new features, [upgrade to the latest version of GitHub Enterprise](#). For help with the upgrade, [contact GitHub Enterprise support](#).

Enforcing policies for projects in your enterprise

In this article

- About policies for projects in your enterprise
- Enforcing a policy for organization-wide projects
- Enforcing policies for project boards

You can enforce policies for project boards within your enterprise's organizations, or allow policies to be set in each organization.

Who can use this feature

Enterprise owners can enforce policies for projects in an enterprise.

About policies for projects in your enterprise

You can enforce policies to control how enterprise members manage project boards, or you can allow organization owners to manage policies for project boards at the organization level. For more information, see "[About project boards](#)."

Enforcing a policy for organization-wide projects

Across all organizations owned by your enterprise, you can enable or disable organization-wide project boards, or allow owners to administer the setting on the organization level.

- 1 In the top-right corner of GitHub Enterprise Server, click your profile photo, then click **Enterprise settings**.

- 2 In the enterprise account sidebar, click **Policies**.
- 3 Under "Policies", click **Projects**.
- 4 Under "Organization projects", review the information about changing the setting. Optionally, to view the current configuration for all organizations in the enterprise account before you change the setting, click **View your organizations' current configurations**.

All organizations: Enabled ▼

View your organizations' current configurations without the enterprise's policy.

5. Under "Organization projects", select the dropdown menu and click a policy.

Enforcing policies for project boards [🔗](#)

Some policies apply only to project boards.

Enforcing a policy for repository projects [🔗](#)

Across all organizations owned by your enterprise, you can enable or disable repository-level projects, or allow owners to administer the setting at the organization level.

- 1 In the top-right corner of GitHub Enterprise Server, click your profile photo, then click **Enterprise settings**.

- 2 In the enterprise account sidebar, click **Policies**.
- 3 Under "Policies", click **Projects**.
- 4 Under "Repository projects", review the information about changing the setting. Optionally, to view the current configuration for all organizations in the enterprise account before you change the setting, click **View your organizations' current configurations**.

All organizations: Enabled ▼

View your organizations' current configurations without the enterprise's policy.

5. Under "Repository projects", select the dropdown menu and click a policy.
