

Disabling team discussions for your organization

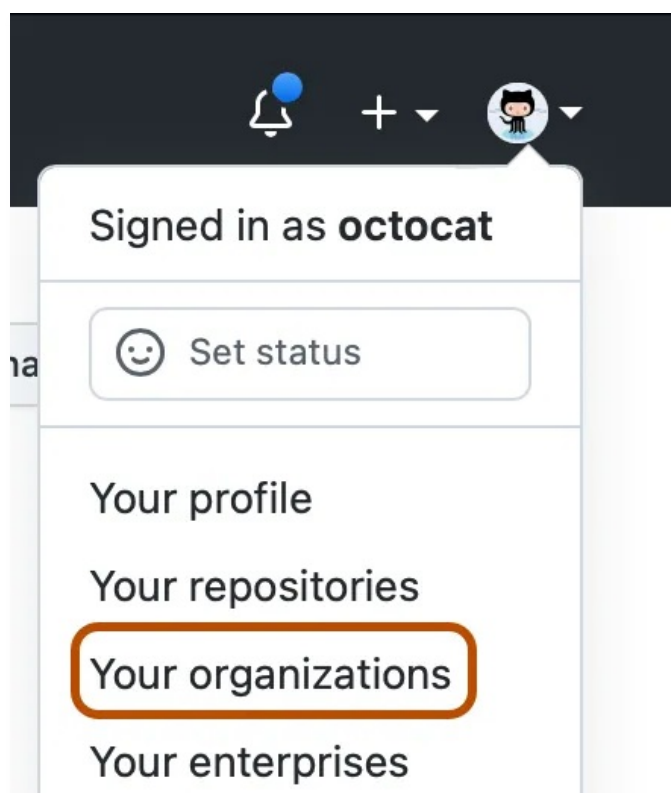

Organization owners can choose to disable or enable team discussions across the organization.

Note: Team discussions will be deprecated in GitHub Enterprise Server 3.12 in favor of GitHub Discussions. You can transfer your existing team discussions to a repository's discussions by using a migration tool that allows team admins to migrate both public and private team discussions. Click the "Transfer" button in the banner at the top of your team discussions page, then choose the repository in your organization that you want to migrate the discussions to.

For more information about GitHub Discussions, see "[GitHub Discussions documentation](#)."

Team discussions are available in organizations by default. For more information on team discussions, see "[About team discussions](#)."

- 1 In the top right corner of GitHub Enterprise Server, click your profile photo, then click **Your organizations**.

- 2 Next to the organization, click **Settings**.
- 3 In the "Access" section of the sidebar, click  **Team discussions**.
- 4 Under "Team discussions", unselect **Enable team discussions for this organization**.

5 Click **Save**.
