

# Closing a project (classic)

If you've completed all the tasks in a classic project or no longer need to use a classic project, you can close the classic project.

## Notes:

- Projects, the all-new projects experience, is now available. For more information about Projects, see "[About Projects](#)."
- You can only create a new classic project board for an organization, repository, or user that already has at least one classic project board. If you're unable to create a classic project board, create a project instead.

When you close a classic project, any configured workflow automation will pause by default.

If you reopen a classic project, you have the option to *sync* automation, which updates the position of the cards on the board according to the automation settings configured for the board. For more information, see "[Reopening a closed project \(classic\)](#)" or "[About automation for projects \(classic\)](#)."

- 1 Navigate to the list of classic projects in your repository or organization, or owned by your personal account.
- 2 In the projects list, next to the classic project you want to close, click .

 <b>Coordinate for new feature ship</b> <span>Private</span> #10 updated on Mar 5, 2020	No description	
 <b>Octo-project</b> <span>Private</span> #8 updated on Mar 19, 2018	For those fun UI changes.	...
 <b>octo-org projects for Q4</b> <span>Private</span> #7 updated on May 25, 2018	No description	...

- 3 Click **Close**.
