

# Search on GitHub documentation

Learn how to use the search functions available on GitHub to find different types of information, like projects, people, and code.

Overview

Start here

## Searching issues and pull requests

You can search for issues and pull requests on GitHub Enterprise Cloud and narrow the results using these search qualifiers in any combination.

## Understanding GitHub Code Search syntax

You can build search queries for the results you want with specialized code qualifiers, regular expressions, and boolean operations.

## Searching for repositories

You can search for repositories on GitHub Enterprise Cloud and narrow the results using these repository search qualifiers in any combination.

## Searching commits

You can search for commits on GitHub Enterprise Cloud and narrow the results using these commit search qualifiers in any combination.

Popular

## About GitHub Code Search

You can search, navigate and understand code across GitHub with code search.

## Understanding the search syntax

When searching GitHub Enterprise Cloud, you can construct queries that match specific numbers and words.

## Searching users

You can search for users on GitHub Enterprise Cloud and narrow the results using these user search qualifiers in any combination.

## Finding files on GitHub

You can search for a file in a repository using the file finder. To search for a file in multiple repositories on GitHub Enterprise Cloud, use the path code search qualifier.

---

## Anonymous users have access to new code view and navigation

July 06

---

## The new code search and code view is now generally available

May 08

---

## No more waitlist - code search and code view are available to all in public beta

February 23

## Guides

### Searching in forks

By default, forks are not shown in search results. You can choose to include them in repository searches, and in code searches if they meet certain criteria.

@GitHub

### Searching topics

You can search for topics associated with repositories on GitHub Enterprise Cloud.

@GitHub

### Searching for packages

You can search for packages on GitHub Enterprise Cloud and narrow the results using search qualifiers.
