

The REST API is now versioned. For more information, see "About API versioning."

# **Project (classic) cards**

Use the REST API to create and manage cards on a classic project.

## Notes:

- These endpoints only interact with projects (classic). To manage Projects, use the GraphQL API. For more information, see "Using the API to manage Projects."
- To create a new classic project, the organization, user, or repository must already have at least one classic project.

The REST API to manage projects (classic) only supports authentication using a personal access token (classic). For more information, see "Managing your personal access tokens."

# Get a project card ∂

Works with <u>GitHub Apps</u>

Gets information about a project card.

# Parameters for "Get a project card"

## Headers

accept string

Setting to application/vnd.github+json is recommended.
