

Configuring basic settings in GitHub Desktop

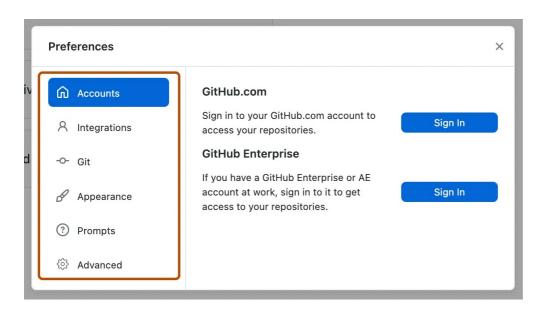

You can access settings for protecting your privacy, connecting accounts to GitHub Desktop, and configuring Git.

Mac Windows

1 In the menu bar, select **GitHub Desktop**, then click **Preferences**.

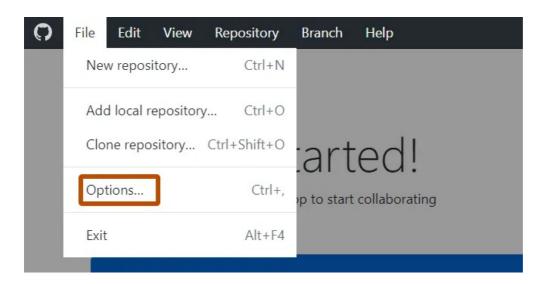

2 To view or change your settings, toggle between the panes in the "Preferences" window.

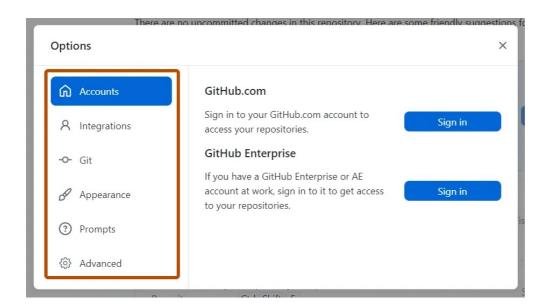

You can choose from the following options.

- Choose **Accounts** to add or remove a GitHub or GitHub Enterprise account.
- Choose Integrations to pick an external editor or shell.
- Choose **Git** to edit your Git configuration.

- Choose **Appearance** to switch between the light or dark theme.
- Choose **Prompts** to enable or disable confirmation dialogs before performing destructive actions.
- Choose **Advanced** for more configuration options.
- 1 Use the **File** menu, then click **Options**.

2 To view or change your settings, toggle between the panes in the "Options" window.

You can choose from the following options.

- Choose **Accounts** to add or remove a GitHub or GitHub Enterprise account.
- Choose Integrations to pick an external editor or shell.
- $\circ~$ Choose $\mbox{\bf Git}$ to edit your Git configuration.
- Choose **Appearance** to switch between the light or dark theme.
- Choose **Prompts** to enable or disable confirmation dialogs before performing destructive actions.
- Choose **Advanced** for more configuration options.
