GitHub Docs

The REST API is now versioned. For more information, see "About API versioning."

Followers

Use the REST API to get information about followers of authenticated users.

About follower administration ∂

If a request URL does not include a {username} parameter then the response will be for the signed-in user (and you must pass <u>authentication information</u> with your request). Additional private information, such as whether a user has two-factor authentication enabled, is included when authenticated through OAuth with the user scope.

List followers of the authenticated user @

Lists the people following the authenticated user.

Parameters for "List followers of the authenticated user"

Headers

accept string

Setting to application/vnd.github+json is recommended.

Query parameters

per_page integer

The number of results per page (max 100).

Default: 30

page integer

Page number of the results to fetch.

Default: 1

HTTP response status codes for "List followers of the authenticated user"

Status code	Description
200	OK
304	Not modified
401	Requires authentication
ANS	Forhidden
