Viewing people in your enterprise

In this article

To audit access to enterprise-owned resources or user license usage, enterprise owners can view every administrator and member of the enterprise.

> **Who can use this feature**
> Enterprise owners can view the people in an enterprise.

About the list of people in your enterprise

To audit access to your enterprise's resources and manage license usage, you can see a list of all the people who have access to your enterprise.

You can see all current enterprise members and enterprise administrators. To make it easier to consume this information, you can search and filter the lists.

Viewing enterprise administrators

You can view all the current enterprise owners for your enterprise. You can find a specific person by searching for their username or display name.

You can also remove an administrator. For more information. see "[Inviting people to manage your enterprise]()."

1. In the top-right corner of GitHub Enterprise Server, click your profile photo, then click **Enterprise settings**.

2   In the enterprise account sidebar, click ⵁ **People**.

3   Under "ⵁ People", click **Administrators**.

Viewing members and outside collaborators 🔗

You can see all the current members or outside collaborators for your enterprise. You can see useful information about each account and filter the list in useful ways, such as by role. You can find a specific person by searching for their username or display name.

You can view more information about the person's access to your enterprise, such as the organizations the person belongs to, by clicking on the person's name.

1   In the top-right corner of GitHub Enterprise Server, click your profile photo, then click **Enterprise settings**.

2 In the enterprise account sidebar, click ㅅ **People**.

3 Optionally, to view a list of outside collaborators rather than the list of members, under "Members", click **Outside collaborators**.
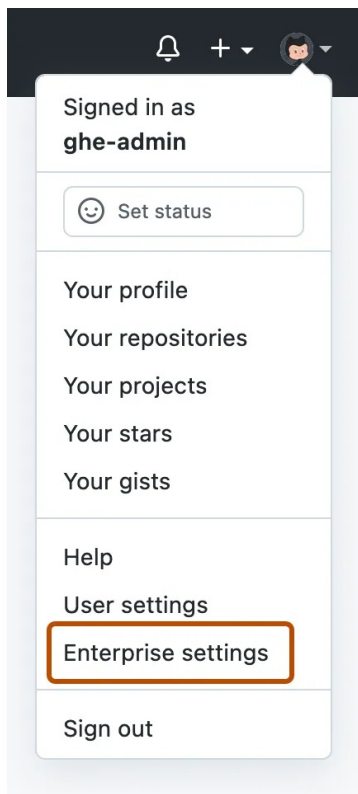

Viewing dormant users ⊘

You can view a list of all dormant users who have not been suspended and who are not site administrators. By default, a user account is considered to be dormant if it has not been active for 90 days. You can configure the length of time a user must be inactive to be considered dormant and choose to suspend dormant users to release user licenses. For more information, see "Managing dormant users."

Viewing members without an email address from a verified domain ⊘

You can view a list of members in your enterprise who don't have an email address from a verified domain associated with their user account on GitHub.com.

1 In the top-right corner of GitHub Enterprise Server, click your profile photo, then click **Enterprise settings**.

2. In the enterprise account sidebar, click ⚙ **Settings**.

3. Under "Settings", click **Verified & approved domains**.

4. Under "Notification preferences", click the ⊙ **View enterprise members without an approved or verified domain email** link.
