Learn the skills you need to contribute to open source projects and grow your own portfolio, with GitHub Community Exchange.

About GitHub Community Exchange

GitHub Community Exchange is a student community within the GitHub Global Campus portal. As a student, it's a place where you can get exposure for your project and discover other student repositories in need of collaborators and maintainers.

You can help your peers learn open source skills, become a project maintainer, and grow your GitHub portfolio and network within a safe and verified community platform.

GitHub Community Exchange allows you to:

- Discover student created repositories
- Star repositories of interest
- Submit a repository in need of collaborators
- Submit a repository to teach new skills
- Manage your repository submissions

For more information, see "Contribute with GitHub Community Exchange."

To access GitHub Community Exchange, visit your GitHub Global Campus dashboard at https://education.github.com.

If you're a student or faculty member at an accredited educational institution, you can apply for GitHub Education benefits, which includes access to GitHub Community Exchange within GitHub Global Campus.

- If you're a student and you haven't joined GitHub Education yet, apply using the student application form. For more information, see "About GitHub Global Campus for students."

- If you're an educator and you haven't joined GitHub Education yet, apply using the teacher application form. For more information, see "Apply to GitHub Global Campus as a teacher."
